INTERNSHIP

G- SOFT TECH SOLUTIONS - MERN 2025

I successfully completed a MERN Stack Development Internship at Better Tomorrow, where I gained hands-on experience in building full-stack web applications. I worked with MongoDB, Express.js, React.js, and Node.js to develop scalable, efficient, and user-focused solutions.

PROJECTS

SKIN SENSE APP: 2025

Developed an AI-based Skin Disease Prediction App using Flutter and TensorFlow Lite for on-device image diagnosis. Integrated Firebase for authentication and designed a multi-language UI with dark/light mode, including features like remedy suggestions and doctor recommendations.

Technologies: Flutter, Dart, Firebase.

SKILLCONNECT APP:

Developed a Flutter mobile application connecting job seekers and employers through skill-based matching. Implemented Firebase backend with real-time data synchronization and Google authentication. Created intelligent matching algorithm based on user job status and skill sets. Built complete user onboarding flow with profile management and settings functionality. 2025

Technologies: Flutter, Dart, Firebase.

ENTERTAINMENT HUB: 2025

Designed a full-stack TV and Movie streaming platform using **React.js** for the frontend and **Node.js** with **MongoDB** for the backend. Implemented secure user authentication, real-time data fetching, and dynamic content display. Built RESTful APIs to manage movies, TV shows, and user data. Enhanced the application with a responsive UI, modular architecture, and optimized performance for seamless navigation.

Technologies: React, Node.js, Express.js, MongoDB.
